CO SENSOR

PROTECTS FROM INVISIBLE DANGER

FIBARO®

HOME INTELLIGENCE

ONE DEVICE, MANY FEATURES

The FIBARO CO Sensor is an ultra-light, compact, battery-powered, Z-Wave carbon monoxide detector, designed to be placed on a wall. Its high sensitivity allows to detect the presence of carbon monoxide (CO) gas at an early stage in order to prevent carbon monoxide poisoning. Alarm is signaled with a built-in siren, blinking LED indicator and sending notification. Additionally, the device is equipped with a temperature sensor.

Sound Alarm

Light indicator

BSI CERTIFICATE

The FIBARO CO Sensor possesses the BSI certificate with the Kitemark licence, recognized worldwide as a sign of quality and safety. Each sensor with the BSI Kitemark symbol is subject to continuous control, which covers routine product testing and the evaluation of manufacturing quality control processes.

SIMPLICITY SAVES LIVES

Simple and easily understood notifications
allow anyone to immediately assess threat.

Healthy

Carbon monoxide was not
detected or its concentration
is extremely low, you can relax.

Moderate

The CO concentration could affect how
you are feeling, make sure you air the room,
check ventilation and find the source.

Alarm CO

CO levels are high enough to be a threat
to life - follow the rules applicable for critical
levels of CO concentration.

GUARDS YOUR WELL-BEING

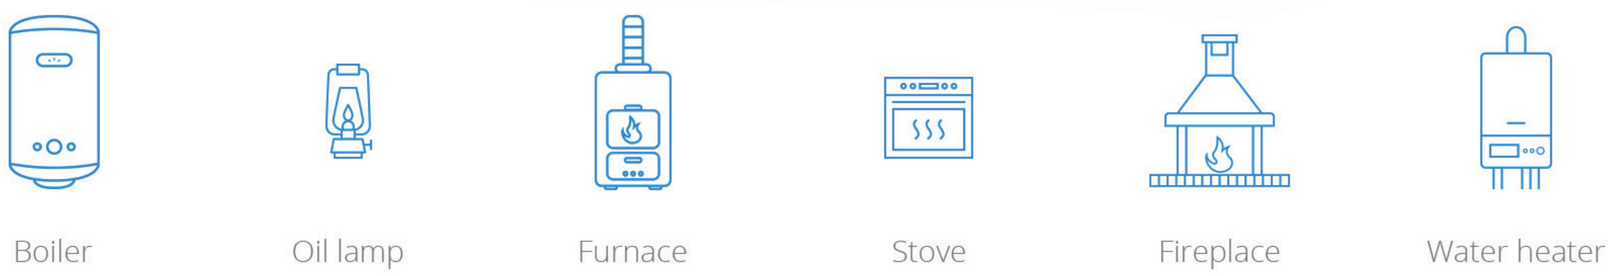
Even small concentrations of carbon monoxide may cause discomfort and aggravation over time.

THE CO SENSOR

MODERATE CONCENTRATION

Moderate CO concentration level was detected in the living room.
To maintain your well-being, air the room.

MONITOR THE KEY APPLIANCES



THE SILENT KILLER

Carbon monoxide is an invisible, odorless gas.
This makes it particularly dangerous for people and animals alike.

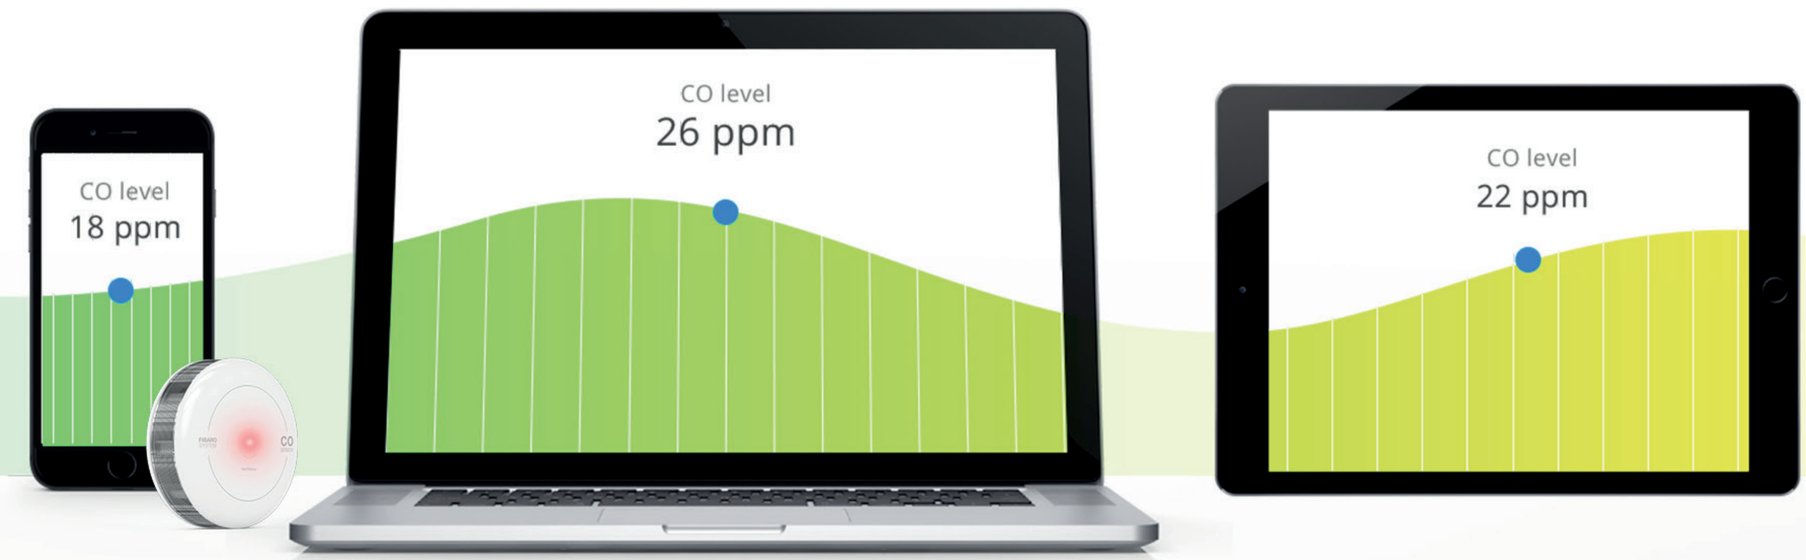
TO KNOW MORE

The FIBARO carbon monoxide sensor is a unique solution. The device ensures exceptional measurement precision and offers clear CO concentration graphs when connected to the system. The information concerning CO levels is saved, so you can go back through the archived data whenever you like.



A FULL PROTECTION SYSTEM

The FIBARO CO Sensor works
with other devices, creating a smart,
active protection structure.

IT DOES NOT REQUIRE THE SYSTEM

Our carbon monoxide sensor may operate as a stand-alone device. While it does not provide the features available through the system, it is still a precise and efficient carbon monoxide sensor. You can use it yourself or gift it to your loved ones, even if neither you nor they use the FIBARO system.

FIBARO CO SENSOR

Wireless communication

2 years battery life

Complex scene activation

Smart notifications

Works with Android and iOS devices

A wide range of operating
